*With Alicia Adsera. **Journal of Labor Research**, 2022: [Link](#)*

WORKING PAPERS

- “Rural Electrification, Social Norms, and Female Labor Allocation: Evidence from Rural U.S. and India”
Working paper, 2024. *Forthcoming.*
Abstract: I study the impact of rural electrification on the female labor force share and the role of local social norms in mediating this effect. I test theoretical predictions from a model of female labor allocation across home and market production in the presence of social norms. I compare two different historical and institutional settings. First, using data on over 1,900 rural U.S. counties post the Tennessee Valley Authority program (1940), I show that electrification induces a U-shaped change in female labor force share. Second, I leverage detailed information on employment and social norms across over 540,000 Indian villages after a national electrification program (2001) to show that electrification boosts female share of non-agricultural labor by 4-5%, although impacts vary significantly across the caste hierarchy. I also find heterogeneous effects with respect to pre-treatment Purdah (veiling) compliance, gender attitudes and women’s historical contribution to production outside the home.
